Release Date: January 16, 2020[58] This was the release of the debut quadrant for EVE Online, thematic around PvP. The quadrant's components were tied together, for example, only the ships affected by the heavy missile swing changes were allowed to enter locations that were part of the Dragonaur Blitz event in the game. The event was also used to present Nirvana Faction Implants. Other events in the game during the quadrant, such as Skilling Spree and Skilling is Just A Means, encouraged players to engage in PvP and PvE rewarding efforts with skill points. The Filaments Needlejack, capable of carrying a group of players on a random solar system, were reintroduced after their initial introduction as RDLF-09 Filaments during the 'Naughty or Nice' event. [59] The rounded quadrant with the Loyalty to Low Sec update, which included the mechanic of the frigate escape bay, allowing players whose battleship was destroyed to continue fighting through a frigate that was stored inside the battleship. PvP was encouraged in low-security space by increasing loot drops and faster Warp speeds, this event entered the second quadrant. Invasion Chapter 3 Release Date: May 26, 2020[60] Expansion Changes On May 6, 2014 at its annual convention Fanfest, the CCP announced the change in the current development cycle of two expansions a year, for ten expansions a year in a six-week rapid release cycle per expansion. [61] In September 2015, CCP announced that while the five-week launch cycle would be kept for content such as life quality changes, ship balance changes, visual updates, new ship skins and plot developments, they would also be bringing back expansions: OneIt will be a set of large and connected resources that both make impactful changes in EVE, and make a declaration of what kind of game Eve is.
